How to care for Seeknit bamboo knitting needles and precautions for use

1. Each bamboo has different colour

Since bamboo knitting needles are made of natural materials, the fibre, colour, and texture are different for each one. In addition, the colour may change over the years of use.

2. Laser engraving

The size for each bamboo knitting needle is laser engraved. The bamboo has a hard lenticel part and a soft inner part. Furthermore, because the density and hardness of the fibres differ from bamboo to bamboo, there are differences in the depth of engraving.

3. Handle gently

Bamboo knitting needles are made of natural material, so if strong force is applied, the needle may break, scratches or dents may occur. If you hold the needle excessive firmly and knit it, the needle may break, such as when the stitches are tight. When handling, do not apply excessive force and handle it gently.

4. Precautions for use and storage

Since natural bamboo is used, please refrain from using it if it gets wet with water or if water vapor adheres to it. Please refrain from storing in a humid place. The needle may become less slippery and get mouldy.

5. What to do if the glide of yarn on the needle worsens

If used for a long time, the surface of the bamboo may deteriorate and the slippage of the yarn may worsen. Apply solid wax (solid wax such as candles) and polish with a dry cloth.

6. How to deal with discoloured metal parts

Circular needle and interchangeable circular needle have brass metal fittings and they may discolour over time. In that case, soak a cloth with a commercially available penetrating lubricant (e. g. WD-40) and wipe the metal fittings. At that time, please be careful not to let the penetrating lubricant adhere to the bamboo needles. If it adheres, wipe it off immediately with a cloth.

Seeknit Bamboo Needle Guarantee

All of Seeknit's bamboo knitting needles are manufactured in Japanese workshops by skilled experts.

They are shipped only after passing a complete inspection.

If, however, any products are found to be damaged or defective after purchase, they do offer a 1-year guarantee from the date of purchase against manufacturer's defects. This is for manufacturing defects only and not damage cause through use.

Defective products may be exchanged at the store where they were purchased.

Please return the defective products to the store along with the store receipt.

The exchange policy does not cover the following cases:

- Defects caused by normal wear, accidents, misuse, abuse, or carelessness
- Products purchased from non-authorized dealers
